

Meet a few Families Helped by the Nativity Project

This is the Home of a sister from the Church. She has 7 Children, and God has blessed her so much through the Sewing project. God has also provided her family with a proper stove through the Nativity Sets, which works on bottled gas. (She previously had a wood stove, and one hotplate). Below are some photos of this dear sister and her home.

Iwona, at her front door, holding her handiwork.

Inside the home, leading to the children's room.

Their old wood stove.

God's provisioning - Praise the Lord!

Through being on the sewing project for the Nativity Sets, she has been able to obtain running water in her home, put in a running toilet, bath, sink and washing machine.

A Corridor in the shed, leading to the toilet.

The toilet. (No running water, no bathroom)

Their new bathroom underway in renovation, for which they are so thankful

The side of House and entrance. This has since been built in to make a warm entrance room to the home. Many of the other parts of the house have had other further renovations since taking the above pictures.

A Sister with her sewing Machine, who was helped for many years by making Joseph. Behind her is the wood heater that warms her small home. Her husband had had a stroke.

Her humble Kitchen, which has been renovated since helping on the Nativity project.

Ivona (#2), with her two children and her mother. She has never sewn before, and supports her family by the donations for her sheep and babies. This family had lived in 2 small rooms with no bathroom, and God has since given a small home made from a large, old room upstairs, mostly through the donations for her sewing.

This is the sister who makes the Stables, standing outside their home entrance, holding a donated sewing machine in box. She and her husband are Christians, and have 7 children and several grandchildren. Her husband helps out at the Mission, and they have depended greatly on the support received by being on the Nativity Project.

Mazena, holding her donkeys. She lives at the Mission with her 2 children. She helps at the Mission daily, and supports her family by being on the nativity Project.

Basia and her family, standing outside their former home in their village. Basia made the King with the crown for many years and was greatly helped by the project. This family came to the Lord through the Mission's 'feeding program' for children. Basia often rode her bike a 20-km round trip weekly to drop off her Kings to the Mission. Her daughter has since finished Bible School.

Sylvia, outside her home. Making the camels has supported her family for many years

This is our Assistant Pastor's wife, Gosia, holding a donated sewing machine. Gosia helps to support their family, with 2 young children, by helping make the King with Turban. Both her and her husband are converts from the Mission work many years ago, and have trained and are now faithfully in the Mission and church for several years in pastoral care.

Receiving their donated sewing machines - some sisters who have been helped by the Nativity Project. These machines were donated because of certain production faults in the machines, and came as God's provision for us.

This is dear Teresa. She is not able to do craft-work, so she supports herself and her son by making up the Gift boxes and then packing the Nativities into their boxes. She is standing outside of her home.

All the above families, as well as the other families who are also being supported by this Project, and the Elim Christian Mission, all say a heart-felt and genuine *thank you* to all who have supported the needs of these families and supported Mission work through the donations for this loving handiwork. We know it is grace from the Heavenly Father, and He takes such loving care of His people.
